COMPANY INFORMATION

We handcraft light fixtures and furniture out of eco-friendly materials. Some people might find what we do a bit extreme...glass shades made of recycled bottles? Fixtures made of recycled steel? Sure thing. We are continually developing new ways of using recycled, reclaimed, natural, and sustainable materials into our fixtures. To us, it just makes sense. There is a bit too much waste in the world, and upcycling yields some pretty darn cool results. We take these responsible materials and craft fixtures the old-fashioned way with the very skilled hands of our artistic team in the Philippines.
