COMPANY INFORMATION

Made in Duluth, Minnesota, partially with recycled post-consumer plastic, Loll's modern outdoor furniture adds a unique and modern aesthetic to outdoor spaces. Founded on principles of efficient and responsible use/ reuse of manufacturing materials, Loll was conceived as a way to repurpose excess skate ramp material from our former company, municipal skatepark creator. Loll began by creating a modern Adirondack chair with the durable skate-proof material that was proven to require no maintenance and hold up in all weather conditions. Appreciate the outdoors with maintenance-free furniture made by Loll Designs. Learn more about Loll's sustainability efforts at loll designs.com/sustainability.

PRESS RELEASE

High Point, NC – Loll Designs is excited to exhibit at High Point Market for the first time October 14-18, 2023. The made-in-the-USA outdoor furniture company has three presentations in High Point, NC for the occasion, each designed by Julie Lyle of Indie House Designs with a unique theme to show the breadth and depth of their collection. Recognized worldwide for its contemporary designs, ethical manufacturing, and innovative use of materials, Loll looks forward to meeting like-minded visitors at High Point who value sustainability, durability, and thoughtful original aesthetics. "The goal is to let people live the Loll lifestyle - even if just for a moment during their tour of High Point Market," says Julie Lyle, Owner/Designer at Indie House. "Loll means living luxuriously and with intention among the outdoors. Our nature-inspired lifestyle scenes show how it's done." Inspired by outdoor living in the East, West, and Midwest, Loll will present furniture for the modern lollygagger at these High Point locations:

Suites at Market Square - in the Salon on the ground level (Salon G-6055)

Inside the Salon, Loll will bring its home of Duluth, Minnesota - along the shores of Lake Superior - to life with its Fire Ring anchoring Tall Adirondack chairs and Deck chairs. An upholstered Nisswa Sofa and Swivel Chair pair with a Lollygagger Chaise Lounge to transport guests to a lakeside cabin scene. To round out the exhibition, a 72-inch Alfresco dining table with umbrella will be surrounded by dining seating to show the power of enjoying year-round outdoor living together.

Showplace Walkway

At a prime location leading up to the entrance of Showplace -the hub of the High Point Market - Loll draws inspiration from the sun, sky, and lifestyle of Palm Springs, California. Here, visitors will find Westport Adirondack chairs and Satellite tables for lounging; a cocktail corner with the Lollygagger bar cart, Fresh Air bar table, and Norm bar stools; and a beautiful installation of Loll's modular Tessellate planters. Animal-friendly, this area will also have a Rapson birdhouse and fan-favorite pet bowls.

South Elm Plaza

Here, Lyle and Loll used the urban background of New York City as inspiration. Black and charcoal upholstered Platform One seating will surround a lollygagger cocktail table with metropolitan accent seating in black and red and planters in orange. This is a great outdoor area for visitors to touch down for lunch and relax comfortably.
