

Introducing Jakobsen Copenhagen to the US customers

Building on more than 50 years of experience in upholstered furniture, Jakobsen Copenhagen combines deep expertise in design, product development and production with a strong understanding of the international furniture market.

Alongside our established B2B business, we have launched Jakobsen Copenhagen, our new consumer-facing design brand. Since launching, Jakobsen Copenhagen has established a growing retail presence, including more than 40 stores in Germany within its first six months. The brand combines Danish design tradition with contemporary comfort, craftsmanship and the creative spirit of Copenhagen.

At the heart of our approach is close collaboration with selected retail partners. We believe strong growth is built through long-term relationships, combining our furniture expertise with our partners' understanding of their customers and local markets.

With a new Copenhagen hub and continued international expansion, Jakobsen Copenhagen is now taking its next step - bringing more than five decades of Danish furniture expertise to new partners and markets.

At High Point Market in North Carolina, we look forward to introducing Jakobsen Copenhagen to the North American market.
