## COMPANY INFORMATION

Flocke Lighting's sculptural wool shades are designed around the physiological effect of light — how it shapes a space and the mood within it. Designed to calm light, sound, mood. Every shade is hand-felted from New Zealand wool and finished with bodies of custom hand-poured brass. Nothing is mass produced. Material and form work together so light itself becomes part of the room — soft, diffused, and quietly warm. A calm you can see, hear and experience.

Flocke is a material and human-led process: time, restraint, and repetition define the outcome. Beauty and well-being from the same material. Designed in Charleston, SC
